# INDUSTRIAL PACK

Solutions for industrial environments

As protection needs may be multiple and vary according to each individual business, Stormshield has designed a set of industrial security packs that are as simple as they are attractive while meeting the needs of specific uses.

These packs guarantee the continuous update of protection systems considered essential for the running of your business. In addition, they integrate hardware maintenance, software patches and upgrades, access to technical support 5 days a week through our partner network and the provision of the Stormshield Security Research area.

### INDUSTRIAL SECURITY PACK

Companies looking for protection for their industrial infrastructures can subscribe to this package. It is tailored to carefully finely filter and manage access to the operational network while ensuring in-depth inspection of industrial protocols.

The VPN connection feature in particular (both IPsec and SSL) provides a secure access point for remote maintenance operations.

### EMBEDDED SECURITY PACK

This package is designed for organisations that aim to protect vehicles operating in critical environments for challenging aeronautical, space and military missions.

Its secure storage of secrets, IPS analysis of VPN traffic and above all compliance with the Restricted Distribution (RD) mode ensure maximum protection of most sensitive communications.

### Hardware exchange

All security packs include hardware maintenance in order to ensure business continuity in the event of a hardware failure. Your appliance will simply be exchanged for a similar replacement product. Three levels of service are available.

- Standard exchange  
Your appliance will be exchanged once our customer service center receives the defective appliance.
- Express exchange  
Your appliance will be exchanged in advance. As soon as our support centers diagnose a hardware failure, the replacement product will be sent, which you would receive the next working day<sup>1</sup>.
- Serenity4all  
With this service, you replace the product yourself once our support centers have diagnosed the malfunction fault<sup>2</sup>.

### Enhanced security

The Industrial Pack can be replaced by a Premium Pack. This means you can upgrade your security solution to increase your level of security.

Premium Pack options (Antimalware, Breach Fighter and Extended Web Control URL filtering) ensure optimum protection against sophisticated attacks.

.....  
<sup>1</sup> Please check with us regarding the eligible countries and cities. Applies to diagnoses made before 1 p.m.

<sup>2</sup> Replacement products must be acquired in advance for this service.
